

Premier Integration Forerunner Clarium Consulting Turns to IceWarp Server as the Premium Solution its Customers Need.

WASHINGTON D.C. METRO AREA — September 26, 2008 — In a move that brings new value to its business clients, Clarium Consulting turned to IceWarp Server for a superior messaging platform with an unbeatable TCO. It is already the choice of nearly 100,000 organizations worldwide, offering power and flexibility to every business class, making it the preferred solution.

Clarium has deployed over 100 IceWarp Server installations and has a thorough understanding of the product. What makes IceWarp Server a winning solution for Clarium is the uncommon convergence of quality, scalability and affordability. “IceWarp provides enterprise-grade messaging with unparalleled ease-of-management and affordability,” said Rob Vazquez, President and CEO of Clarium. “IceWarp Server is not only robust – it also scales gracefully and its One-Click Backup & Restore option simplifies administration. This combination of features is not found in any other enterprise-grade product these days.

Clarium is a leader in specialized data warehouse and business intelligence consulting. It utilizes only the best-of-breed platforms, providing its customers with a clear and competitive advantage. “From the start, it was obvious that IceWarp Server was an extraordinary suite,” said Vazquez. “Though it’s an extremely powerful platform, we had it up and running in just a few minutes.”

IceWarp's ease of management ensures that Clarium can focus more of its efforts on its core competency – providing solutions that differentiate its customers and which offer them a competitive advantage through business intelligence, technology infrastructure, strategy and management, ERP, outsourcing management and CRM sourcing.
